Can a buyer place themselves in it?

A broad claim leaves the reader to guess who it serves and what changes.

Name the situation

> Buyer
>
> Situation

Say what work the product supports

Illustrative: flag incoming requests that need human review under a stated rule.

Illustrative wording

AI for better operations

Which requests need a person to review them?

Give the buyer a basis to compare

What would they do otherwise? What supported difference matters?

Alternatives need evidence

01 Current approach

02 Product difference

Mark what the sentence still needs

Check buyer, task, alternative and evidence before making a product claim.

Clarity does not prove results

- Buyer
- Task
- Alternative
- Evidence
