A demo makes one interaction visible

Illustrative example: one request is classified and sent for human review.

One example, one observed interaction

> Request
>
> Result
>
> Review

A buyer can inspect the workflow

Does this step fit the task and the people responsible for the next action?

Show the part they must judge

Input

Decision point

A demo leaves reliability open

It does not establish accuracy across cases, time saved or typical results.

Do not stretch the example

Shown once

General performance unknown

Match the claim to the evidence

State the example and conditions; test broader claims on relevant cases.

Specific proof supports specific claims

- Example
- Conditions
- Untested
